

 **EARLY DESIGN VERIFICATION**

If you want to make your production process as efficient as possible or need prototypes of your game for pre-campaign reviewers and previewers, talk to your Panda Representative about Early Design Verification (or EDV).

With EDV, we'll speed up your timeline by making sure your game files are ready for mass production even before you have your game funding in place.

- ✓ Ensure your files are ready for production
- ✓ Deliver your games up to 6 weeks earlier
- ✓ Critical to making review copies
- ✓ No production contract required
- ✓ **Free!** (see details)

 HOW DOES IT WORK?

With EDV, we'll provide you with an upload site to send us your game's design files. Next, we'll pair you with a Panda Prepress Specialist. They'll check your files to make sure they meet both your specifications and the formatting standards necessary to manufacture your game at the highest quality. Note this is a technical check only and design services are not offered as part of EDV.

Checking graphics files is required to prepare your game for mass production. EDV does this work earlier in the process – ***even before you have a production contract*** – and can make your timeline leading up to production more efficient. That allows you to deliver games sooner and frees up time to focus on other critical steps of the process.

EDV also gets you ready to make high-quality review copies to share with reviewers and previewers ***before*** your crowdfunding goes live.

 **DO I NEED TO SIGN A CONTRACT?
HOW MUCH DOES IT COST?**

With EDV, no production contract is required and the fee is typically \$500 or less depending on the size of your project.

But here's the great news: decide to manufacture with Panda and we'll credit the full amount of your EDV project onto your manufacturing contract, making EDV essentially ***free!***

READY TO BEGIN?

Just ask your Panda Rep about Early Design Verification and whether it fits your needs.

You can also send an email to hello@pandagm.com and ask us about EDV.
